

AUDIT RESULT FOR <https://example-startup.com>

Solid technical foundation but the messaging and CRO categories are dragging the overall score down noticeably, with a handful of critical security gaps that need attention before this converts as well as it could.

Category scores

Executive summary

Modules audited	2
Modules in critical state	1
Modules with warnings	1
Modules passing cleanly	0
Total findings (pass / warn / fail)	3 / 1 / 3
Unverified checks (lookup failed/timed out — not scored)	0
Critical-severity findings	1
High-severity findings	1
Actionable code fixes generated	2

Site classification

- B2B SaaS marketing site (saas)
- Pricing page present with tiered plans
 - Sign-up CTA repeated across 4 sections
 - No e-commerce checkout flow detected

How the overall score is calculated

The overall score is a weighted average across six categories (messaging 20%, UI/UX 20%, CRO 20%, SEO 20%, brand 10%, security 10%), each independently scored from 0-10 based on deterministic checks against the live HTML and HTTP response.

Audit modules

Technical SEO — score 6.5/10 — WARNING				
Status	Severity	Finding	Detail	Evidence
PASS	—	Title tag present	Title tag found and within length limits.	title tag 41 chars
FAIL	MEDIUM	Meta description length	Meta description is 312 characters, will be truncated in SERPs.	measured 312 chars
WARN	LOW	Canonical tag	Canonical points to a URL with a trailing slash mismatch versus the actual served URL.	canonical trailing slash mismatch
PASS	—	Robots.txt reachable	robots.txt returned 200 and parsed correctly.	GET /robots.txt -> 200

Security — score 4.0/10 — CRITICAL				
Status	Severity	Finding	Detail	Evidence
FAIL	CRITICAL	Content-Security-Policy	No CSP header present on any response.	curl -I response headers
FAIL	HIGH	Strict-Transport-Security	HSTS header missing, leaves a downgrade window on first visit.	curl -I response headers
PASS	—	HTTPS redirect	HTTP requests correctly redirect to HTTPS with a 301.	GET http -> 301 -> https

Performance (lab measurement data)

Values below come from a single automated Lighthouse run against this URL — lab data, not real-user field measurement, and can vary run to run.

Metric	Value
Performance score	72/100
Accessibility score	91/100
Best Practices score	83/100
SEO score	96/100
LCP (Largest Contentful Paint)	2800 ms
CLS (Cumulative Layout Shift)	0.08
TBT (Total Blocking Time)	210 ms
FCP (First Contentful Paint)	1400 ms
Speed Index	3100 ms

Lighthouse issue	Description
Eliminate render-blocking resources	3 stylesheets and 2 scripts block first paint by an estimated 620ms.
Properly size images	Hero image is served at 2400px wide but displayed at 800px, wasting ~180KB.

Real-world Core Web Vitals (origin-level, CrUX, past 28 days) — from actual Chrome users, the higher-confidence number where it diverges from the lab run above.

Metric	Value
Overall category	AVERAGE
LCP (field)	3100 ms
CLS (field)	0.11
INP (field)	240 ms
FCP (field)	1600 ms

Recommended fixes (2)

Security — Response headers

Problem	Missing Content-Security-Policy header allows inline script injection in a compromised-dependency scenario.
Evidence	<code>curl -I https://example-startup.com</code> showed no content-security-policy header in the response.
Fix	Add a strict CSP header at the edge/middleware layer scoping script-src to self plus any required third-party origins.

```
- // no CSP configured
+ headers: [
+   { key: "Content-Security-Policy", value: "default-src 'self'" }
+ ]
```

SEO — Meta description

Problem	Homepage meta description is 312 characters, far past Google's ~155-160 character display limit, so it gets truncated mid-sentence in search results.
Evidence	Live meta description content measured at 312 chars.
Fix	Trim the description to a single, complete sentence under 160 characters that states the core value prop.

```
- <meta name="description" content="Example Startup is a revolutionary next-generation platform that helps b
+ <meta name="description" content="Example Startup automates your team's workflow end to end, with AI tools
```

X / Twitter	Just ran our site through Audityxe - 6.4/10 overall, decent SEO but our CRO score needs work. Fixing the security headers first.
LinkedIn	We audited our own landing page with Audityxe and found some eye-opening gaps in conversion optimization and security headers. Sharing the process because transparency matters.

Competitor comparison — vs https://competitor-site.com

https://competitor-site.com overall: 7.8/10

Comparison

Competitor scores higher on SEO (9.1 vs 8.0) due to structured data coverage.

Your CRO score (4.8) trails theirs (7.2) mainly due to CTA repetition and form friction.
